21 March 2021

Dear Students,

World Water Day is held annually on 22 March 2021 as a means of focusing attention on the importance of freshwater and advocating for the sustainable management of freshwater resources. This Day is an opportunity to learn more about water related issues, be inspired to tell others and take action to make a difference. Achieving clean water and sanitation for humans worldwide is one of the UN's key priorities.

World Water Day 2021, the theme '**valuing water**' specifically recognizes the crucial role of healthy ecosystems in maintaining water supplies around the world. The value of water is about much more than its price – water has enormous value for our households, food, culture, health, education, economics and the integrity of our natural environment. If we overlook any of these values, we risk mismanaging this finite, irreplaceable resource.

We will be celebrating **WORLD WATER DAY on 25th March 2021, (Grade 1 to 6 from 12:30 pm to 1pm and Grade 7 to 9 from 1:00 to 1:30pm)** online through Classera as it's important for students to first understand the current state of clean water around the world and the importance of conserving fresh water for the future.

Following programs will be conducted:

1. Video on Water Day
2. Awareness Program on Scarcity of Water
3. A presentation by Teacher
4. Presentation or program by students
5. Message or participation by parents
6. Competition

Following are the details of the competition for each level:

**Level 1, 2 & 3: Create a decorative chart about your usage of water for a day.** (decoration should be related to Water Day theme)

This will help the students to understand the importance of water by developing awareness of their own daily consumption.

**Level 4 to 7: Present a meaningful photograph of your own or from the internet related to the theme "valuing water"** and speak based on the photograph for 2 minute. (sample photo given)

**Level 8 & 9: Table Topic competition.** The students will present the topic related to water day given to them on the spot and will speak impromptu for 2 minutes. (The speech should be presented with a proper beginning, body and conclusion.)

Regards,

**"Save water, and it will save you"**
